

# WE'RE VACCINATION READY

### COVID-19 Vaccination Update

*From TJ Griffin, PharMerica's Chief Pharmacy Officer and Member of Operation Warp Speed*

Registration for the Pharmacy Partnership for Long-Term Care Program closed on November 9. As the industry waits for the first vaccine approval, what should your facility be doing now? Here are 5 ways PharMerica can help you get vaccination ready.

- 1. Through our partnership with Walgreens,** we have you covered with on-site clinics when a vaccine is ready. We're providing Walgreens the names of facilities who registered for the program and census counts so Walgreens can ensure it has the appropriate number of doses and supplies for staff and residents. Walgreens will then map facilities to their closest pharmacy and schedule the clinics. Walgreens has given over 60 million immunizations over the past decade and will use its proven process to create a turn-key process for facilities.
- 2. We're developing support materials** for your facility and residents and their families. Since the beginning of the pandemic, we have provided over 30 webinars and eGuides for clients and non-clients alike to help them with guidance on everything from handwashing and PPE to protocols and safety guidelines. We are continuing that effort by developing materials to ease any concerns about the COVID-19 vaccines and ensure a seamless experience. We are also leveraging Walgreens' retail platform to reach patients directly through social media and other avenues
- 3. As more information is available, we'll keep you updated** on next steps with these regular updates. We quickly learned in the early days of the pandemic how important it was for facilities to have accurate information they could trust. Amidst all the other pressures owners and operators are facing right now, our goal is to serve as a single-source for credible information. As the vaccine situation continues to evolve, we will be sure to keep you in the know with regular emails like this one.
- 4. While you wait for the vaccine, we've got your back** with resources to help you continue to follow best practices to keep staff and residents healthy. In addition to adhering to CDC and state and federal government guidelines, remember that you can look to PharMerica for actionable guidance, like our free eGuide on infectious disease protocols and dedicated COVID-19 webpage.
- 5. We're here for you.** From our hands-on clinicians in the field to your dedicated account management team, know you can turn to us with any questions about your facility's COVID-19 response and the impact of the impending vaccine on your staff and residents. While we may not have all the answers at this point, we have your best interests at heart and hope that simply having someone you can trust will help you be able to better navigate this stressful time.
